for good

We manufacture Active Pharmaceutical Ingredients as part of Ferrer, one of Spain's leading pharmaceutical companies.

Our business is based on developing highly competitive processes for the manufacture of high added-value active pharmaceutical ingredients that meet the strictest quality specifications.

Through our growing international presence, our products are exported to the largest regulated pharmaceutical markets.

We aim to make our industrial activity environmentally compatible, as demonstrated by our ISO 14.001: 2015 certification. Our products are manufactured under strict European environmental and work safety regulations.

At Ferrer, we want to promote a new way of doing business and use profit as a force for good. We want to make a positive impact in building a fairer and more equitable society.

Our business model is focused on caring for the health of people while also protecting the planet. As such, our strategy is based on three pillars:

GREAT PEOPLE

We promote a people-centered culture based on trust and accountability, in which talent thrives.

LIVEABLE PLANET

We promote environmental protection for our own good.

COLLECTIVE ACTION

We explore new forms of collaboration to address our society's most critical challenges.

Why Interquim?

Broad experience in dossier registration worldwide. Support customer submissions.

Our analytical services include analytical method transfer and the free supply of chemical reference standards throughout the lifecycle of our products. Our Regulatory Affairs department has extensive experience in regulatory submissions (CoS, CTD/eCTD) with the most important agencies worldwide, including the US, EU and Japan.

Project management to shorten time-to-market. Strong IP status.

Our products are exported to the largest regulated pharmaceutical markets in accordance with all applicable local intellectual property rights. Our IP experts continually analyse the legal status of our products and can resolve any specific doubts our clients may have, while strictly observing confidentiality agreements.

Own production and R&D at Barcelona site. Extensive in-house technical expertise.

With a staff of over 178 people, our 18,000m² state-of-the-art installations are approved by the US FDA, PMDA and EU, and our quality system and production are governed by GMPs. Our R&D has a proven track record in developing chemical processes, purifying active ingredients, carrying out the analytical development required to fully characterise them.

Our Portfolio

Fully developed

Click on the API for details.

Aripiprazole Monohydrate	Antipsychotic
Celecoxib	Antiarthritic
Ciclopirox	Antifungal
Ciclopirox Olamine	Antifungal
Ferric Carboxymaltose	Iron Deficiency Anemia
Imiquimod	Basal Cell Carcinoma Genital Warts Therapy
Lifitegrast	Dry eye syndrome
Olmesartan Medoxomil	Antihypertensive
Paliperidone*	Antipsychotic
Paliperidone Palmitate	Antipsychotic
Pimavanserin Tartrate	Induced psychosis in patients with Parkinson disease
Rasagiline Tartrate	Antiparkinson
Risperidone	Antipsychotic
Rivastigmine	Treatment of Alzheimer's Dementia
Rivastigmine Tartrate	Treatment of Alzheimer's Dementia
Roflumilast	Treatment of COPD
Rotigotine	Antiparkinson
Solifenacin Succinate	Urinary Incontinence Therapy
Tadalafil	Erectile Dysfunction Pulmonary Arterial Hypertension
Tapinarof	Psoriasis, Atopic Dermatitis
Telmisartan	Antihypertensive
Tolterodine Tartrate	Urinary Incontinence Therapy
Torasemide	Diuretic Treatment of Hypertension
UTP Trisodium Salt*	Treatment of neuropathological conditions of osteoarticular metabolic and infectious origins

Risperidone

CHEMICAL FORMULA

The chemical structure consists of three main components linked together. On the left is a benzoxazole ring system with a fluorine atom at the 6-position. This is connected at the 2-position to a piperidine ring. The piperidine ring is further connected at its 3-position to a 4-methyl-1,2,3,4-tetrahydropyridine-2(1H)-one ring via its nitrogen atom. The rightmost ring is a six-membered ring containing two nitrogen atoms, a carbonyl group, and a methyl group.
